

Table of Contents

Abstract	4
From the Editor	5
Introduction.....	6
Chapter 1	7
Methods of geothermal energy collection.....	7
1.1. Heat of dry rock.....	7
1.1.1. Hot dry rock.....	7
1.1.2. Salt domes	9
1.1.3. Providing geothermal energy with borehole heat exchangers.....	13
1.2. Heat of geothermal waters	16
1.2.1. Single-well systems	16
1.2.2. Multi-well systems	21
Chapter 2	29
Opening geothermal water reservoirs	29
2.1. Technology of drilling up a geothermal layer	29
2.2. Drilling muds.....	30
2.3. Construction of geothermal wells	31
2.4. Sealing the casing	32
2.4.1. Corrosion of cement stone.....	33
2.4.2. Influence of thermal stress on efficiency of sealing the casing	33
2.4.3. Permeability of cement stone	36
2.5. Hardware at geothermal well outlets	37
2.6. Tests on geothermal layers	38
2.7. Methods of increasing the flow (injectivity) and clearing the connection between wells.....	39
2.7.1. Clay-removal from water-bearing layers	40
2.7.2. Reaming in the reservoir zone	40
2.7.3. Acid treatment	43
2.7.4. Fracturing and crushing rocks	43
2.8. Examples of geothermal wells in Poland	44
2.9. Examples of geothermal wells in Slovakia	47
Chapter 3	49
Production of geothermal waters	49
3.1. Circulation of geothermal water	49

3.1.1. Methods of forcing water circulation	49
3.1.2. Circulation pumps	50
3.1.3. Pipelines	50
3.2. Heat collection system	51
3.2.1. Heat exchangers	51
3.2.2. Heat pumps	51
3.3. Clogging	54
3.3.1. Mechanical clogging	54
3.3.2. Corrosion	54
3.3.3. Chemical clogging	55
3.3.4. Biological reactions	55
3.3.5. Mineral sediments.....	56
3.4. Volumetric water flow rate and distance between wells in geothermal doublets	56
3.4.1. Basic mathematical relations	57
3.5. Pressure of water injection into the injection well	60
3.5.1. Strength of pipes	63
3.5.2. Fracturing pressure	63
3.6. Water temperature drop in heat exchangers	64
Chapter 4	67
Selected methods of use of geothermal heat	67
4.1. Cascaded collection of energy	67
4.2. Generation of electrical energy	69
4.3. Direct heat use	70
4.3.1. Heating facilities	71
4.3.2. Heating open-air (geothermal) pools.....	76
4.3.3. Agriculture – heating greenhouses	79
4.3.3. Heating in agriculture – heating soil	85
4.3.4. Heating in agriculture (food industry) – drying.....	87
4.3.5. Ice and snow removal from surfaces	92
4.3.6. Heating fish farms	96
4.4. Indirect use of heat	100
4.5. Peak heat loads in geothermal heat plants.....	100
Chapter 5	103
Exemplary use of geothermal water	103
5.1. Recreation	103
5.2. Balneology	103
5.3. Minerals.....	105
5.4. Cosmetics	106
Afterword	108
Bibliography.....	109
